Jacob Ryan Thompson

DOB - 05 - 12 - 1991  
 Cellphone : 502 - 302 - 2840

Hello and good evening to everyone there, I hope we are all having a nice new year.  
 Let me get this first part out of the way , and then I will have some details I will speak over until our next meeting ,

I have read through the previous open records discussions and meeting resolutions ,  
 ( Which are VERY well written , so well written might I add , they can reveal many facts about a few other possible concerns ,  
 I would like to thank your office for that. ) , and I have noticed 3 general things , both

- \*\*\* a large influx of requests to open records from people who either - request the wrong information or  
 - Not understanding the communication of all our terms  
 like Prima Facet ,  
 - Do not properly understand the law and process.

\*\*\*- A large number of Prima Facet style concerns , as if , when requesting something we first must prove its existence ,  
 when  
 well , when working with computers and digital data , or any information thats not how that works , thats just bad records  
 keeping and organizing.

- Good record keeping and organizing , that is ALWAYS kept TRANSPARENT and OPEN , of just what IS or IS NOT  
 available , should eliminate the need for prima facet entirely. This is just requiring each public servant to make a site and  
 organize their data and make the LIST of data available , publicly available , on say a bi - weekly basis , probably using a  
 website of some sorts . ( Talk about creating jobs eh ? )

- \*\*\*a large amount of Unreasonable or Unburdensome requests , through a lack of bad communication , bad follow up ,  
 and bad description of the agreed ,

Exact data , type , structure , and amount requested. --- This is really a very simple explanation and solution.  
 Someone doesn't or did not have their sh\*t together , period. Be it the requester asking for a reasonable amount of  
 receiving of said data , or the public servant who did not  
 PROPERLY PREPARE THE DATA BEFOREHAND.

Check me out one time ,  
 -- I will site my own ruling for this case , of why unreasonably burden decisions as a whole , are unreasonably  
 burdensome  
<https://www.ag.ky.gov/Resources/orom/2024-OROM/2024/24-ORD-131.pdf>

I asked for all the data within two days , they couldn't search for it easily , ( their fault not mine )  
 and your office ruled they violated my request.

---- I asked for a kind of , burdensome request , but it was because I called the feds on myself when I had my identity  
 stolen ,  
 in an attempt to make a report on the one who stole it fully.

So , I started to use the FBI to try and gain valuable data about them , but they were not helping , as you can see by my  
 original complaint , maybe it was ongoing still then , im not mad at them , its just sloppy handling of data.

Well , my response is well yeah , I know 2 days of data is a lot , but dont you have that all nicely packed away in a folder called ,

-- All the data on this day or that day - ???????

Well , I mean , I KNOW you guys all do have all that data , nice and perfectly arranged and transparently shown for each public entity ,

. . . . right ?

I KNOW it gets sent out quickly and is easily seen and there are no problems . . . . Right ?

. . . I know were not sharing any data or admin / login credentials with other agencies , . . . . Right?

.... If you thought this , you may be wrong.

I KNOW you arent letting entities record data , while also not allowing public servants to share that data like , oh yeah ,

Microsoft teams and Zoom doesn't let us record it , or theres not a button there , so IDK.

( I need a little less excuses from these people , and we can make a easy way to do it. )

And after I can properly finish up with all of my inherited troubles from this university we call UofL , one specific class , a monopoly pulling the strings ,

and a few strange patterns of occurrences that are now well documented , and the actions and followings of all involved in an accurate reading ,

I will then , be able to focus more heavily on open records themselves.

I am writing an article on this type of shall you say ,

"Open records procedure and implementation for public servants "

- for a methodology for quick and convenient way for public servants and entities to proceed with requests ,

and especially financial transparency , when working with data ( specifically electronic ) ,

to be more properly categorized and collected amongst them and distributed to each

open records request needed.

Along with a series of other adventures in the IT and Cybersecurity realm , that has now found its way to me.

and I invite each of you to glance over it when I am finished.

I envision a clear and basic method and procedure of categorizing all data separately ,

searching through that data ,

and distributing it quickly and efficiently for each and every request -

Thereby , assisting other public servants who bear the burden of completing such and said

numerous and amounting amount of requests , that I see that your office has to deal with .

- A little bit of file management , some data extraction , and organization would easily fix all of this.

-- Like the issue where ,

[[[

. A request that does not precisely describe the records "places an unreasonable burden on the agency to produce often incalculable numbers of widely dispersed and ill-defined public records." 99-ORD-14.(1) ]]]

(1) <https://www.ag.ky.gov/Resources/orom/2024-OROM/2024/24-ORD-180.pdf>

--- this is a big issue , because the only ones who are defining the term , unreasonable burden ,

is every person except the one who made the request , and if we simply had better communication around the

TYPE and SPECIFICS of each request and what each public agency DOES

or DOES NOT

and SHOULD or SHOULD NOT already have , in clear writing before it begins.

your office would never have to deal with the issues of ,

- The majority of "Prima Facete " style conclusions , where the debate shifts ,  
reasonably so ,  
to the responsibility of the entity as to where they should have them in the first place ,

This is not a guessing game , and fixing these problems, this would do us a great issue.

I mean this is not a guessing game n the digital world , either its there or its not. No games.

Now FOR the subject of working on Open Records opinions and proposals ,  
I have very little funds for this type of thing , so if your office would be interested in moving forward with such  
arrangements ,  
I would be happy to focus on the expedient processing and handling of data for an easy and standardized method, if I  
could afford it.

Answers from public agents like ,  
" Zoom doesn;t have a record button , so I can't complete your request " , and the days of that crap have really got to go.

If its your software , its your responsibility , - point blank - , can we all get on board with that ,  
pretty pleeeeeeease ?

--- Besides , there's MANY professional grade recording software tools for free.

Example # 2.

Or even the more aggressive and disgusting type , like the university of Kentucky arguing that ,  
"Open records does not apply to Deloitte , due to client attorney privilege. "  
see - <https://www.ag.ky.gov/Resources/orom/2024-OROM/2024-ORD-153.pdf>

this is all a lot to go over and talk about , and like I said ,I would do a lot better with a proposal plan out sometime of some  
of these resolution  
possibilities , like with a job or funding , or a contract because I am simply to low on funds to expend the time and energy  
on it it requires.

-----  
I would love to talk useful conversation , around opinions , of solutions available for open records requests. I aim to also  
ease the over all  
burden of constant processing with more and more open records violation requests , going through the AG's office.

-----  
I am writing ALL of this out in a neat article fashion , on a website for us all to share ,

- and work towards some of the solutions around the needs in smoothly processing these requests for public servants.  
( your office seems to have no problem responding to even your OWN open records requests , so whats wrong with  
everyone else?

I dont know if they got the memo , or manage all their records well , lets work on that. )

and I invite each of you to glance over it when I am finished.

that will take some time , but for now ,

=====  
=====

Moving forward.

My requests around this issue over Open Records , with UofL and UofL police are pretty simple here.

I just got a little Open Records Violation I would like to be handled please.

--

-

I think I had gave your office some details about the whole UofL police issue , and I had to put in the LAST open records complaint from your office , to even get a response, it was pretty bad.

I felt like Lt. Minor was literally acting like a Hitler. Literally Hitler , he reached for his gun and yelled and threatened me to leave.

Like , literally a fat old baby Hitler , it was entirely pathetic.

Thats part of the records I was asking about -- here ---

Then , during my first request ,  
I was looking for a BASIC copy of a police report, from when they interrogated me, which was repeatedly denied to me over the period  
of several weeks.

***Your office is the only reason I had ever received that police report , which says I am female and Hispanic , and I am neither , thank you very much.***

I will state this again , I believe there was a criminal violation of - withholding the information to process the open records request , from UofL police , as I had asked them 5 times for it,  
- my own police report - and asked nearly every  
high ranking officer there, who all gave different answers.

-----

=====  
=====

Here I am only asking for two videos of data

I just need to proceed with an official open records violation request  
As you can see here , I am requesting simply for two , BASIC videos

#1 the Video of "Literally Hitler" , Lt. Minor , yelling and threatening me on 10/30/2024

#2. A copy of the video of the investigation , during the initial harassment investigation on I think , 09/04/2024 , or around that date. - from bogus claim by a teacher .

- I went to the police station and was interrogated , and I was just asking for a copy of all of that video evidence.

So that I can .You know , gather more evidence on all these Hispanic women out here, because that's what the police report says.

the KORA Request email you see here , is one where I has sent a request on their proper site , after finally having it , and they had responded to me on the 12th of December.

Then they said , that they need like 2 weeks for the holidays , I was like ok sure.

so they said they would respond by the 7th.

On the 7th, I got a response , saying that because of the snow , I would have to wait a few more days ,

and that I would receive a response -  
and I quote , - no later than - Jan. 13, 2025.

And as that date has passed , I would like to proceed , with a violation of this  
request - case number 24-696 .

Thanks.

And thank you all for all of your hard work , I can tell you are staying busy lately.  
Best regards , Jacob Thompson.

p.s. ----

Also , lastly , to show my usefulness , I will leave you with a tool.

These are two, tried and true ,  
p2p file sharing web applications , to distribute files to anyone who needs it.

This allows people ( like public servants , ) too send larger files , like large videos , directly and securely over the internet.

- <https://toffeeshare.com/>

- <https://www.file.io/>

Enjoy , and thanks again.
